CGPA

8.82

B.Tech. Computer Engineering
Class of 2026

PROFESSIONAL SUMMARY

Motivated Computer Science fresher (Class of 2026) with a strong foundation in full-stack development, OOP, databases, and machine learning. Proven ability to build real-world applications end-to-end — from React frontends to Flask backends and ML model integration. Quick learner with hands-on project experience, active GitHub contributions, and a passion for writing clean, maintainable code. Eager to grow within a structured engineering environment.

TECHNICAL SKILLS

Languages & Frameworks

- Java
- Python
- JavaScript (ES6+)
- HTML5 & CSS3
- Node.js
- React.js
- Flask
- REST APIs

Databases & Tools

- MySQL
- MongoDB
- Git & GitHub
- VS Code
- OpenCV
- Basic ML (.h5 models)
- OOP Principles
- DBMS

Core Concepts

- Data Structures
- Operating Systems
- Computer Networks
- Image Processing
- IoT (Minor)
- Agile Mindset

PROJECTS

Smart Agro System — Leaf Disease Detection | *React · Flask · Python · ML (.h5)*

- Built a full-stack web application that enables farmers to upload crop images and receive instant disease diagnoses.
- Implemented clean REST API design connecting React frontend to ML inference pipeline — end-to-end ownership of the project.

AI-Based Vision-to-Braille Assistive System | *Python · OpenCV · Image Processing*

- Developed an accessibility-focused system to convert visual data (text/patterns) into tactile Braille output for visually impaired users.
- Focused on real-world usability and inclusivity — demonstrating empathy-driven software design.

Malware Detection System | *Python · Pattern Matching · NLP*

- Designed a system to identify and filter malicious email content using filtering and pattern-based detection techniques.

EDUCATION

Bachelor of Technology— Computer Engineering (Minor: IoT)

Madhuben & Bhanubhai Patel Institute of Technology, Gujarat

2022 – 2026

- CGPA: 8.82 | HSC (12th): 70.6% | SSC (10th): 70.4%
